**PUBLIC NOTICE
WAGAMON'S WEST SHORES
June 10, 2008**

Based on a complaint received from Wagamon's West Shores regarding water pressure our Public Works Department flushed the hydrants and lines today. State of Delaware standards for water pressure is 25 PSI. In our testing it has been determined that Wagamon's water pressure is 43 to 45 PSI. Residents may experience brown water when initially turning on water. Please allow water to run until clear. Should you experience any problems please contact our Public Works Superintendent Allen Atkins at 302-462-1774.
